

e-zone

DUCTED AIR-CONDITIONING. WAY BEYOND COOL.

YOU'RE LOOKING AT THE ULTIMATE CHILL PILL.

e-zone's 7-inch colour touchscreen does double duty as a tablet. Now you can manage your comfort and your home from one central hub.

The e-zone screen is easy to read and simple to navigate. As the touchscreen is integrated with both the air management system and air-conditioning unit, you can control every function from the one screen. With a touch, you can see which rooms are receiving air and how much, open and close zones, set programs and turn the air-conditioner on or off.

You can control the rest of your home with the same ease by loading it up with your favourite Android internet browser and apps. Pay bills, order groceries, search a recipe, play music, skype while you cook... As the touchscreen is wired to the wall, it never goes missing and never needs charging.

MORE CONTROL AND CONVENIENCE WITH THE e-zone APP.

The e-zone app turns all your other smart devices into additional remote controls. It works through your Wifi, and lets you access and control your airconditioning both from within the home and anywhere in the world.

True comfort is being in total control.

A TOUCHSCREEN THAT'S ALSO A TABLET. COOL.

CONTROL IS INTUITIVE

The e-zone touchscreen controls both the air management system and as well as the air-conditioning unit. If you know how to use a tablet or iPad, then you already know how to use it. Simply tap on the function you want and follow the prompts. We've designed the system to be as intuitive to use as possible, but the HELP button is always there if you need it.

HOME SCREEN

You can turn the system ON or OFF directly from the home screen by pressing the POWER symbol next to the e-zone logo. The left hand side of the screen displays your Air-Con Status. It tells you if the system is on, and what the temperature, fan speed and mode settings are. To adjust any of these settings, press the Air Con button on the right hand side of the screen.

You can also set a timer from the home screen by simply tapping the ON or OFF timer buttons. Each tap will increase the timer by 30 minutes, up to a maximum of 2 hours. To remove a timer, press the CLEAR button.

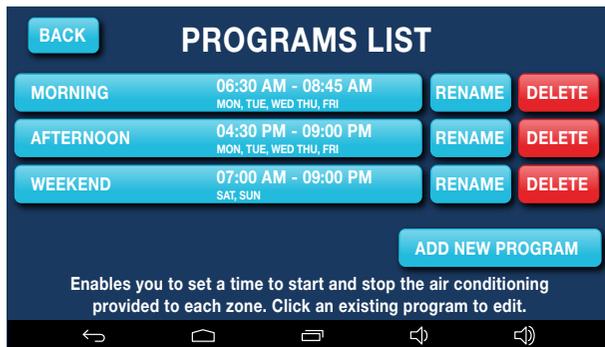

AIR CON SET UP

Tapping the AIR CON set up button will take you through to this screen. To change the MODE or FAN SPEED, tap on the appropriate button. To increase or decrease the TARGET TEMPERATURE, press the plus or minus button. Press BACK to return to the home screen.

ZONES

To control how much air goes where, press the ZONES button. The ZONES screen will display every room in your house. To open or close a zone, simply tap on the room name, or to adjust the airflow press the plus or minus button. If the room has a temperature sensor, the number displayed will be a temperature not an airflow percentage.

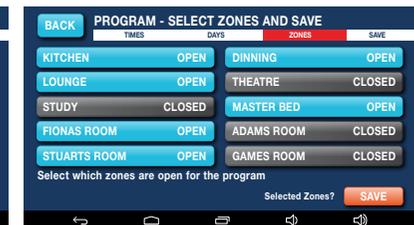

PROGRAMS

Programming is the way to ensure you never wake up to a cold bedroom or come home to a sweatbox ever again. It's so simple with e-zone. Selecting PROGRAMS will bring you through to this screen. Simply tap ADD NEW PROGRAM and follow the prompts.

Choose when you want the air-conditioning to start and stop, what days you want it to run, and in which zones. Presto! Program set.

You can create up to 5 different programs.

STANDARD SYSTEMS:

If all bedrooms are on one zone, all rooms must be air-conditioned, even when some are not in use.

E-ZONE:

When every room is zoned separately you only air-condition the rooms you are using.

ENGINEERED TO SAVE ENERGY WITH 10 ZONES.

Our obsession with comfort extends to your energy bills. e-zone is engineered for precision air management and maximum energy efficiency. As e-zone has up to 10 zones, each room is controlled independently. You control precisely which rooms receive conditioned air so there's no paying to heat or cool empty rooms.

This is in sharp contrast to standard systems that have only 4 or 5 zones, and therefore have to clump several rooms in each zone. You may only be using 3 rooms, but due to restrictive zoning you'll pay to run the system in nearly the whole house.

MASTER BED

- 75% +

PRECISION AIRFLOW FOR PERFECT COMFORT.

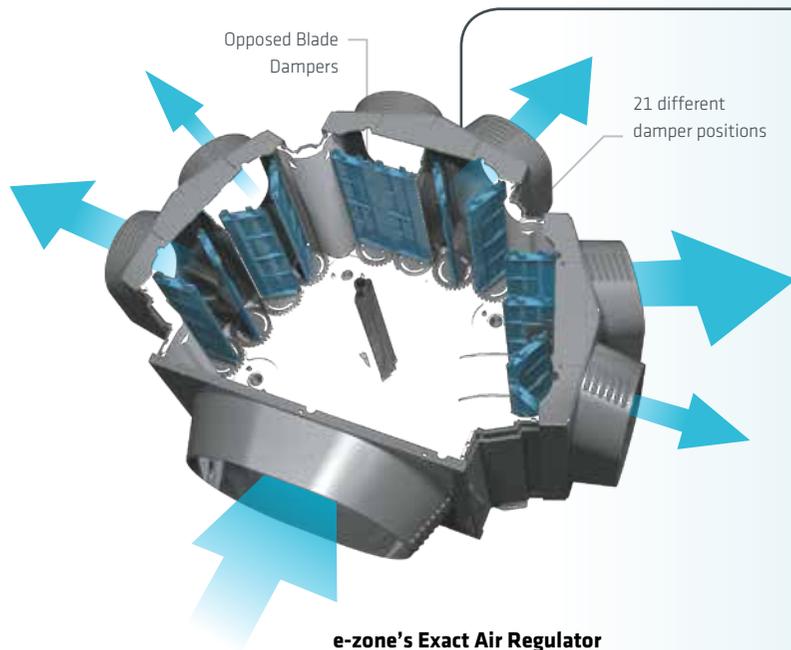

You not only control which rooms receive air, you determine exactly how much. With e-zone you can adjust the airflow to any room from 5 to 100% output, in precise 5% increments. Everyone can customise the airflow to their room, to their personal preference.

THE OPTION OF INDIVIDUAL TEMPERATURE CONTROL.

If you'd prefer everything to be adjusted automatically, you have the option of upgrading to Individual Temperature Control (ITC). Each ITC sensor acts like a thermostat, instructing the system to continually adjust the airflow to maintain your selected temperature. They are particularly beneficial in west facing or upstairs rooms.

Alternatively you may use ITC in an East-facing room to ensure rooms are not over air-conditioned for extra energy savings.

e-zone's Exact Air Regulator

was awarded an Australian Design Mark award for innovation.

Standard Systems

- Conventional dampers and internal 'scoop'
- Imprecise

THE COMPONENTS OF PRECISION AIR MANAGEMENT.

Housed in the ducting, dampers control airflow. In standard systems, dampers look like a large metal tube with a circular internal scoop that pivots to increase or decrease airflow. As the scoop starts to close, it quickly meets a great deal of resistance making it impossible to precisely control airflow.

Our solution was to create our own, based on the design used in commercial high-rise buildings. Instead of a pivoting scoop, e-zone's Exact Air Regulators incorporate 6 Opposed Blade Dampers (OBDs). They work like double doors that can open and close in precise 5% increments. As the air goes exactly where it is directed, you achieve your preferred temperature as energy efficiently as possible.

A REPUTATION FOR INNOVATION.

e-zone is made in Australia by Advantage Air. We are an Australian company that has been designing, manufacturing and distributing innovative ducted air-conditioning systems from our head office in Perth, Western Australia, since 1990. We take pride in creating and exporting a local product that is world class.

Our systems are renowned for harnessing the latest technology to deliver unrivalled comfort and energy efficiency; first with Zone 6, then Zone10, Gen III, and now with e-zone.

We embrace innovation and invest heavily in research and development. Over the past 25 years, we have developed numerous industry firsts and earned a slew of patents, registered designs and design awards.

e-zone is designed to be robust and intuitive to use. However, should you ever require service or support, being local we offer unmatched response times. Because we'd hate for you to ever lose your cool.

PEACE OF MIND WARRANTY.

Since 1990 Advantage Air components have become known for their quality, precision, strength and durability. To prove our confidence, we provide a:

- 10-year warranty on all ducting and mechanical components
- 5-year warranty on all electronic controls.

Activation Code - The e-zone system has an activation feature. A code may be required from your installer to activate your system within the first 21 days.

CORPORATE RESPONSIBILITY.

Advantage Air is all about bringing comfort to people. We are proud to be a sponsor of Channel 9's Matt & Kim to the rescue. The show delivers life-changing renovations to families in desperate need.

AIR-CONDITIONING CHECK LIST

BEFORE YOU DECIDE ON A SYSTEM, MAKE SURE YOU HAVE ASKED THESE QUESTIONS.

 The Air Management System	Other Systems	Advantage Air System
Does the ductwork meet all Australian Standards (AS1530 and AS4254)?		✓
Are the ductwork and fittings covered by a full 10-year warranty?		✓
Are the products Australian manufactured for Australian conditions?		✓
Does the dump zone only open when needed?		✓
Do the dampers have opposable blades for greater air delivery precision?		✓
Does the filter come with a 10-year warranty?		✓
Is the filter electrostatically charged to improve filtration?		✓
Do you have a wide choice of air diffusers?		✓

Advantage Air endeavours to achieve compatibility with as many modems as possible, and whilst Remote Access works fine on most routers, there are some routers or applications that are not compatible. If your router is not listed on our website and you experience issues with the operation of Remote Access, please contact your IT specialist for help with your modem settings.

REMOTE ACCESS.

Remote access is available with e-zone products, and utilises your Wifi equipped modem to operate. Your modem will require UDP and UPnP to be enabled as well as a strong wifi connection between the modem and your wall mounted touch screen panel.

Our recommended modem is the TPLink AC1200 Archer D5. You can find a list of other compatible modems that have been tested on our website.

- Android devices need to be running OS v4.1 or higher
 - Apple devices need to be running iOS v7.0 or higher.
